

BrightFlow Services Ltd - Board Finance Pack

Prepared for AI-BOSS stakeholder demonstration | May 2026

Executive Summary

The business remains solvent, but cash pressure is increasing. Management should treat runway as a near-term risk if monthly burn continues above NZD 30,000. The team should delay non-essential hiring until debtor collection improves or operating expenses are reduced.

Key Observations

- Cash at bank was reported at NZD 120,000 on 12 May 2026.
- Accounts receivable of NZD 45,000 is concentrated across three customers, with two invoices older than 30 days.
- Accounts payable of NZD 21,000 is manageable, but supplier payments should be scheduled carefully.
- The current monthly burn rate is approximately NZD 28,000, implying a runway of around 5.4 months when receivables and payables are included.
- If burn rises to NZD 40,000 without additional revenue, runway would fall materially and should trigger a management review.

Metric Snapshot

Metric	Value	Date	Comment
Cash at bank	NZD 120,000	2026-05-12	Available liquidity
Debtors	NZD 45,000	2026-05-12	Collection priority
Creditors	NZD 21,000	2026-05-12	Short-term obligations
Monthly revenue	NZD 80,000	2026-04-30	April trading month
Operating expenses	NZD 52,000	2026-04-30	April trading month
Monthly burn	NZD 28,000	2026-04-30	Used for runway
Runway	5.4 months	2026-05-12	Monitor monthly

Recommended Actions

- Prioritise collection of overdue debtor balances before approving new discretionary spend.
- Review operating subscriptions and contractor costs if runway falls below three months.
- Use AI-BOSS to compare hiring, expense increase, and delayed revenue scenarios before committing.
